

## Full Stack Developer (f/m), Munich

As experienced full stack developer you will join our agile development team building our products. You will employ modern development methods such as TDD and continuous integration. You will mostly be working with Python, Java, Cassandra and MySQL.

### Who We Are

wywy is a young adtech company, based in the center of Munich with offices in New York and London. We develop and operate cross-media advertising solutions that enable advertisers to deliver and monitor campaigns across both television and “second screen” devices.

### What We're Looking For

- Minimum 2 - 3 years of experience in development of complex software projects
- Deep knowledge of at least one OOP language (Java, Python, PHP)
- Deep knowledge working with databases (relational or NoSQL)
- Open minded, eager to learn
- Team player, hands-on mentality
- Very good English language skills, German language skills a plus
- Must be eligible to work in the European Union

### Where You'll Work

As part of our agile team you will contribute towards making wywy the market leading second screen technology provider. Besides an attractive salary, there is an agile and international environment waiting for you. At wywy, you can develop the software, as well as actively shape the processes and company culture together with your colleagues.

Our office is located in the center of Munich close to the main train lines – surrounded by many nice restaurants, bars and shops.

### Interested?

Then please submit your CV via email with the subject “Full Stack Developer” to
