

(Senior) Software Engineer (f/m), Munich

As part of our team you will build micro services for the backbone of our products on top of our next generation infrastructure. You will work within our complete stack of technology to find the best way to integrate new features and help in the transition to the new infrastructure.

Who We Are

wywy is a young adtech company based in the center of Munich with offices in New York and London. We develop and operate TV analytics solutions that enable advertisers to analyze the impact of their TV campaigns on their websites and apps.

Your Responsibilities

- Design, build, operate and troubleshoot the new generation of our micro services powering our products in an agile team setting
- Solve problems that impact our system and build automation to prevent recurrence
- Influence new features and products within their entire lifecycle from the idea to production
- Continuously improve and ship our services as often as possible to production

Within the first week, you will have pushed your first assignment into production. Within a month, you will have held your first tech talk. Within a year, you will be the new table football champion or have stopped playing it months ago.

What We're Looking For

Minimum qualifications:

- A degree in computer science or a related technical field, or equivalent practical experience
- Experience in one or more of these languages: Java, Python, Go, PHP
- Experience building scalable web services in a globally distributed environment
- Experience working in a test-driven environment and automated deployments
- Experience working in a Linux environment and configuring services on your own
- Very good English language skills, German language skills a plus
- Must be eligible to work in the European Union

Preferred qualifications:

- Expertise in automation from the build pipeline, the deployment to provisioning hosts for the first service deploy
- Expertise in Linux/Unix systems from kernel to shell
- Expertise with configuration management systems like puppet

If you think that you would be a good fit for our team and our culture matches the way you want to work, you are welcome to send us an email with the subject "Software Engineer" to Mr. Stefan Modl (stefan.modl@wywy.com).
